➤ **Javac Edge
Hand Tools**

Experience the design, style and quality of Javac Edge Premium hand tools.

➤ **REMS
Electric Bender**

Universal and compact electric cold bending of pipes and tubes.

Installation & Maintenance Tools

**Rothenberger 18V
Cordless Vacuum Pump**

Show me an AC and Ventilation engineer that doesn't love new tools and quality kit and I'll show you someone that's empty inside!

And Installation & Maintenance kit doesn't come more quality than this Rothenberger Cordless Vacuum Pump.

The most powerful cordless vac pump on the market, the Rothenberger is the definition of quality German engineering.

With its 18V battery, the compact but powerful cordless pump is the perfect mobile solution for when you're charging a system up on a roof top (where power can often be hard to access).

Available in 2.0 CFM and 5.0 CFM, both models are vacuum stable and feature a gas ballast valve and a tough brushless motor. Plus charger, bucket, oil and 5/16" SAE and 3/8" SAE adaptors. Enjoy!

**PRODUCT
HIGHLIGHTS**

**Threaded
Rod Cutter
M8, M10
& M12**

Talking about great bits of kit, you'll love this precision engineered M8-M12 Threaded Rod Cutter from Greenmill. It cut your rods quickly and cleanly, plus deburring and thread correcting. Ta dah! No more nut trouble.

ROTHENBERGER

Brazing Torches

We know that some of you engineers haven't yet gone over to the dark side (or Pressfit as it's known). Whether you're a die-hard traditionalist or you just love to spark up the Propane, we've got the perfect brazing torches for you. Choose the Rothenberger Super Fire 2 for concentrated high heat. Or if you're looking for added strength and increased max temperature, go double barrelled with the Rothenberger Turbo Torch

www.greenmillac.com/brazing-torch

Charging Scales

FGAS recovery legislation means that effective and reliable charging scales are an essential part of any engineer's kit. We stock most leading brands including Mastercool and Javac. Plus, for extra flexibility and ease of use there's also the Wey-Tek wireless model. With a 30ft range, you can control the scales and display information using a bluetooth-enabled smartphone app. Smartphone not included, obv's!

Design, Style & Quality

Javac Edge Premium Tube Cutter

With its cleverly designed smart spring and titanium blade, this Javac Edge Premium Tube Cutter gives a speedy, clean tube cut every time.

Javac Edge Premium Expander Set

Save hassle and time with this ergonomic and easy to use multi-size expander set. It's also the only set that comes complete with a 1/4" expander head.

Javac Edge Premium Single Size Tube Benders

Available for a range of tube diameters, this single size Tube Bender has a unique Dual Hinge design, making your second bend so simple.

Javac Edge Premium Safe Seal Hoses

Possibly the best charging hoses around, the patented "One-touch" design avoids refrigerant loss and the risk of refrigerant burn.

EASYBEND Airco Line Set Bender

No need for springs or heavy equipment

If you've ever been tempted to try and quickly bend a tube over your knee, you'll know the kinky consequences. This nifty Easybend Line Bender kit lets you bend smaller diameter soft copper refrigerant tube without kinks. Available in 4 sizes, with each size colour-coded for easy identification. They're great for preinsulated pair coils, and handy if you're bending two tubes at a time.

www.greenmillac.com/easybend

- Avoid kinks in copper refrigerant tubes by using the Easybend Kit
- Suitable for four sizes of soft copper refrigerant tube:
 - 1/4", 3/8", 1/2" & 5/8"
- Colour-coded for easy identification
- No need for springs or heavy and expensive equipment.
- Easily retracted and very flexible
- Reusable, with resealable straps
- Easybend is a quick and easy way to bend soft copper tubes

REMS

for Professionals

REMS Curvo Electric Pipe & Tube Bender

Universal, compact electric tool for cold bending of pipes and tubes up to 180°

110V

The ENGINEER APPROVAL system for online orders

STEP 1

Give us a list of your engineers/subcontractors and we will set-up their agreed permissions

STEP 2

Selected engineers can submit their order online for approval to your office without seeing your pricing

STEP 3

Your office is emailed with an itemised list of products submitted. These can then be approved or amended by a member of your team

STEP 4

Once your approval is given, items will be picked and delivered to site as instructed

Keep control of your orders
