

GREENMILL TRADE BULLETIN

**INSIDE
ISSUE #1**

- Roof Supports
- Bespoke Service
- Condenser Units
- Ready-to-Go

Every engineer knows that a top-notch roof installation begins at the base. So get your framework right.

If you've got a very large or complex roof top project, use the bespoke framework service.

When your job is to protect a big metal box from getting damaged, you need to be strong and well designed.

Arms, channel, ends caps, nuts and all the fixings you need to fix a condenser unit to a wall.

Roof Support Frameworks

Welcome to the very first edition of our bright and shiny new Greenmill Trade Bulletin. Each month, the Bulletin will be jam-packed with loads of useful info, features and buying advice on a specific product area. This month, it's Condenser Support. Enjoy!

Every engineer knows that a top-notch roof installation begins at the base. Get your condenser support framework right and your project is part-way there.

Using a popular system, like Strut Foot or Big Foot, no channel cutting means you're going to save loads of time.

Planning your framework installation is straightforward, with a flexible system like Big Foot allowing you to extend from any side and build the exact configuration you need quickly and easily.

If you're after a fast and economical solution to support pipework, tray or ductwork, check out our H-Frame sets. These are supplied complete with feet, brackets and fixings for a super-speedy install; you just need to cut your channel and you're good to go.

Whatever your Roof Support requirements, our range is in stock and available with next-day delivery. Contact our specialist team for more info, or order online from: www.greenmillac.com

Rubber Support Feet

STÖRNCH
Condenser Support

Available in 4 sizes:
250, 400, 600, 1000mm.

If you're looking for a compact roof top support option, take a look at our STÖRNCH Rubber Support Feet. Made from recycled rubber, with easy service fixing, low-profile design and built-in anti-vibration, these feet are perfect for your pipework, duct and tray runs.

Bespoke Frames & Supports

Have you got a very large or complex roof top framework project?

Did you know that we have access to a specialist technical support team, delivering a bespoke framework design and manufacture service?

Whether it's weak roof construction, space constraints, existing obstructions or simply a large-scale installation, the technical team offer a complete framework development service:

- ✓ Feasibility studies
- ✓ Technical analysis
- ✓ Project surveying
- ✓ Design & manufacture

Working closely with your architects, engineers and contractors, the technical team will develop and implement a bespoke framework solution that meets your specific requirements.

So if you've got a large or specialised roof top installation, why not get in touch to find out how our framework experts can support your project.

If you need to find out anything about Hybrid and Pressfit, we've created the ideal online resource just for you, the Greenmill Hybrid Hub.

Our Hybrid Hub features all the main Pressfit and Hybrid connecting systems including RLS, Conex >B< MaxiPro, plus STÖRNCH Barrier Press and Copper Press.

Looking for technical specifications? You'll find them in the Hybrid Hub. Installation instructions? The Hub. Support Videos featuring our very own Simon Makin? Yep, the Hub. Training and installer Certification? Head on over to the Hybrid Hub.

(Free marketing resources? Nope, that's our other support site: www.greenmilldesign.com)

So whether you're an experienced hybrid/pressfit installer looking for the latest technical info, or you're new to the technologies and simply want to find out more, the Hybrid Hub provides a one-stop-shop for all your Pressfit and Hybrid technical requirements.

Greenmill Tool Vouchers

Unless you've been living in a cave for the past three months, you probably already know about Greenmill Tool Vouchers, our new customer reward scheme.

We're really chuffed with the success of the scheme so far. Loads of customers are making the most of it and earning themselves some really serious free toolage.

If for some reason you still don't know how you can get your hands on some great free kit, from Ox Pipe Cutters to a Sealey Roll Cab, speak to one of our team or head to: www.greenmillac.com

Condenser Wall Brackets

If you're after the ultimate installation time saver, try our Condenser Wall Bracket Set. The pre-assembled brackets feature an adjustable hook system and universal fittings that make installation quick and easy, especially on uneven walls.

The sets include a handy back plate spacer and spirit level bubble for correct adjustment and positioning, plus all the fixings you need for your secure install.

Available for 3 weights: 60kg, 90kg, 140kg

Condenser Unit Guards

NEW

Pebble Grey, available 5 sizes:
Small, Intermediate, Medium, Large, Extra large.

Black, available 4 sizes:
Small, Medium, Large, Extra large.

Let's face it, Unit Guards are definitely one of the less glamorous products in the Condenser Support range. When your one job is to protect a big metal box from getting damaged, you also need to be pretty strong and boxy.

But that doesn't stop our Condenser Unit Guards having some really nice design features, like a clever sliding panel system, easy assembly and Allen-headed bolts for extra security. Plus, guards are also now available in a smart black finish. They're proper posh!

Anti-Vibration Products

Vibration dampening technology has moved on a bit in recent years, with our Anti-Vibration Pads featuring the latest composite foam centre that far outperforms traditional rubber or cork.

We've also got a large range of in-stock Rubber Mounts, Mounting Feet, Rubber Tiles and Vibrostrip. So if you're on a job mounting units, we've got all the anti-vibration and sound dampening products you need.

Winter PROMO 500 Five Special Gifts!

**FREE
GIFT**

Spend £500
to claim yours

January can often be gloomy, chilly and a little bit of a come-down after the Christmas festivities. But our Winter Promo500 is still here to warm your cockles and raise your spirits. Choose from our new edition insulated travel mug, Wonder Grip Thermo Plus gloves, or the legendary Greenmill snood.

If you're warm enough and just want to cut pipe we've also got you sorted. Of course, no Promo500 would be complete without our Border Biscuit selection. And don't forget, you can also choose a Greenmill Tool Voucher. Spend them or save up for some really serious free toolage. What will you choose?

Ready-to-Go Wall Bracket Sets | **STÖRNCH** Condenser Support

We were racking our brains for ages, trying to come up with some really clever and punchy USPs for our STÖRNCH Ready-to-Go Wall Bracket sets. Then we realised the clue was in the name. They are simply ready-to-go.

A pair of cantilevered arms, 2 lengths of pre-cut channel, end caps, channel nuts and all the fixings you need to fix a condenser unit to a wall. Job's a good'un.

Supports up to 160kg.
Available in 3 sizes: 450, 600, 750mm.
