

# GREENMILL TRADE BULLETIN

## INSIDE ISSUE #2

### ➤ SpiraSafe

If you're looking for a proper time-saver to speed up your projects check out STÖRNCH SpiraSafe.

### ➤ Soler & Palau

Every engineer loves it when a product makes their job that little bit easier, like the S&P In-line Fan range.

### ➤ DuctRack™

Simplify and promote safe and efficient storage, transport and protection of your spiral duct.

### ➤ InDuct

Interested in making your installs more sustainable? Check out the innovative STÖRNCH InDuct system.

## Spiral Duct & Accessories

Welcome to Issue 2 of the Greenmill Trade Bulletin. Our product focus for February is Ventilation and Ductwork.

From fans to spiral fittings, Greenmill supplies everything you need for your secondary vent installations. And if you're looking for a proper time-saver, to speed up your projects, check out our flagship STÖRNCH SpiraSafe range.

Simply fix the SpiraSafe fitting into a length of spiral and the built-in double rubber EPDM seal gives you a Class D air-tight joint in no time. No mastic required!

SpiraSafe is perfect for those exposed ceiling jobs where your vent work is on show and you want it looking its best, like that posh car showroom or the trendy new restaurant on the high street.

If you want to find out more about SpiraSafe, take a look at the videos on our customer resource website. Presented by our very own Simon Makin, Product Trainer and ex-vent engineer, the videos include an installation demo, technical spec and a speed comparison between SpiraSafe and standard spiral. Plus there's loads of other useful videos (most of them featuring Simon unfortunately):

Ventilation Install  
Materials

**Order up to 5pm for  
next day delivery.**

**Request your catalogue today!**

From standard spiral materials to STÖRNCH SpiraSafe, our vent install range is in-stock and available for next-day delivery. Whether you're ordering over the phone, by email or through our website, if you do it by 5pm we'll get your order to you next-day.

And if you need it really early you can choose to pick up your order from 6.30 am the next morning at our centralised GMCollect hub in Kempston, just off the A1.

## Exceptional Class D Air Tightness

Air treatment can be costly, so it's got to be done right. Rapid growth in the HVAC sector (accelerated by the pandemic) means that your vent install needs to meet pretty stringent requirements. Making sure duct connections are leak-proof maximises their effectiveness and minimises operational costs.

When installing SpiraSafe fittings, the double EPDM rubber gasket ensures a tight and permanent connection between the spiral system components. This means they're Class D air-tight and don't require the use of mastic or sealant.

See the range and order online at: [www.greenmillac.com/spiral-fittings](http://www.greenmillac.com/spiral-fittings)

## Class D Rated EPDM Double Rubber Seals

Inserted Duct showing how the EPDM rubber gasket seals against the inner wall of the duct.

- **SAVES TIME**  
Quick and easy installation.
- **AIR TIGHT**  
No risk of leakage due to the SpiraSafe class D rated double rubber seal.
- **NEAT**  
Ideal for exposed areas, as no need to use sealants.

# TRACK & TRACE

## Take control of your deliveries!

Whilst we don't want to big ourselves up too much, we like to think we're pretty good at spotting what the HVAC sector and our customers want. Which is why we were ahead of the curve when we introduced our delivery ETA text message service a few years ago.

Nobody wants to be hanging around waiting for their delivery to arrive. Or worse, have to pop out and end up missing the van. So our ETA text messaging is great for letting you know that all important delivery time slot. But the clever-clogs at Greenmill thought we could do even better. So we introduced Track & Trace, our market-leading routing software.

Taking delivery updates to a whole new level, Track & Trace shows you exactly where your delivery van is on a map, in real-time. Nipping out for brekkie and need an update? Just keep clicking your text link to follow our driver's progress throughout the day.

**You're welcome!**

# Soler & Palau

## In-Line Steel & Mixed Flow Fans

▶ We also supply a range of Steel Centrifugal In-line fans, from 100 - 315mm diameter.

▶ Watch our In-line Fans video at:  
[www.greenmilldesign.com/videos](http://www.greenmilldesign.com/videos)

### Low Profile & Easy maintenance

Every engineer loves it when a product makes their job that little bit simpler. And our nifty range of S&P In-line Mixed Flow Fans can do just that. The clever support bracket design allows you to remove the motor/

impeller without dismantling the ducting, making that maintenance job quicker and easier. Plus the low profile design makes these fans perfect for ceiling voids and installations where space is limited.

# Store it. Move it. Protect it.

Simplify and promote safe and efficient storage, transport and protection with the DuctRack™

» DuctRack™ ticks the box for...

- Efficiently storing up to 1 tonne of material
- Safely moving duct around site with our SafeStop™ deadman brake system
- Protecting duct from damage and harmful dust ingress

Contact the Greenmill team to find out more about DuctRack™

## Wide range of ductwork accessories available next day.

We know ductwork isn't just about the ducting, so we stock everything you're going to need for your next install, from Heater Batteries and Lagging to Fire Dampers and Hanging systems. We even stock those little protective duct covers that you make the apprentice wear like a shower cap.

Order now for next-day delivery:

## The future of Sustainable ductwork

If you're interested in making your installs more sustainable, check out the innovative STÖRNCH InDuct.

InDuct is a system of pre-insulated ducting and fittings for AC, ventilation, chiller and heating installations. Consisting mainly of glass, sand and soda, InDuct features a patented aluminium foil on both the inner and outer surfaces, which provides an effective barrier against condensation. Easy-cut, easy-fit and eco-friendly, InDuct is the future of sustainable ductwork.
