

GREENMILL TRADE BULLETIN

INSIDE ISSUE #10

► A proper smart job

From trunking to cable clips, matching materials deliver a smart install.

► Tecno Trunking

Combining quality and value-for-money with smart Italian design.

► SpeediDuct Trunking

Available in Ivory and cool, clean white for that clinical finish.

► Summer Promo 500

The weather is getting chillier, so it must be time for our Winter Prom0500

Air Conditioning & Heat Pump Trunking

Most engineers take pride in doing a job well. When you've packed up your tools and had a tidy round, you can take a step back, check out the install and think "yep, proper smart job that".

These days it's not just interior jobs that take all the attention. Exterior install materials have had a bit of a makeover in recent years, with everything from cable clips to trunking now available in smart designs and matching colours.

Black trunking (with matching materials) is becoming increasingly popular for many outdoor installs. The dark colour theme fits well with modern building exteriors, contrasting with red and buff

brickwork, or complementing grey and cladding finishes and black drainage.

To meet the growing demand, we keep huge stock holdings of the most popular ranges of black trunking and fittings from Tecno and Inaba Denko. Matched with black lagging, EnviroTuff cable and black braided hose, you're guaranteed a proper smart job!

Of course, if your job needs ivory, white, or larger 140mm diameter trunking, we've got massive stocks of the most popular ranges, including SpeediDuct, all available for next-day delivery.

HEAT PUMP TRUNKING AVAILABLE IN 140mm

The UK Government has committed to installing 600,000 heat pumps per year by 2028. As our industry ramps up to meet this commitment, it's probably fair to say, there's quite a few engineers doing quite a few heat pump installs at the moment.

If you're one of them, you'll know it can be a squeeze trying to get those bigger pipes into standard trunking. Which is why we stock a range of 140mm trunking and fittings. Available in both black and ivory, the larger diameter gives you all the extra space you need.

Tecno Trunking

We know a great product when we see one, which is why Greenmill is the UK's largest stockist of Tecno Trunking.

Made in Italy, Tecno Trunking combines quality and value for money with smart Italian design. Fire resistant and waterproof, with a smooth clean finish, Tecno trunking is ideal for all interior and exterior installation.

Available in

Ivory: 72mm & 100mm diameter
Black: 100mm diameter

Mini & Maxi Trunking

The go-to product for all sparkies and electrical work, Mini and Maxi trunking are true multi-purpose install essentials.

To be honest, there's not huge amounts to say about Mini, that you won't already know- it comes in a single 16x16 size and you simply stick it on. Stocking a couple of sizes and some fittings does make Maxi marginally more exciting (but it's close).

SpeediDuct Ivory & White Trunking

Did you know that one of the reasons interior AC and vent materials are ivory goes back to the days when people smoked in offices and commercial premises. Now that all non-residential buildings are smoke-free, white fixtures and fittings are making a come-back.

So if you're looking for the clean clinical finish you get with white trunking, check out our SpeediDuct white range.

Available in 70mm, 105mm and 140mm, the SpeediDuct trunking system offers an unparalleled range of fixtures and fittings, to meet all your install needs.

If you've got a tricky install challenge, the SpeediDuct range probably has a fitting to solve it. Like the really handy flexible coupling. When you need to kick out over an obstacle or go round a bend, the SpeediDuct Flexi Hose Kit gives you ultimate flexibility. Available in white and ivory the Flexi Hose Kit includes all the fixings and fittings you need for a quick and easy install.

Easy to install, fire resistant and weatherproof, SpeediDuct is also available in the larger 140mm diameter, ideal for multiple pipe runs, including heat pump installations.

The engineer's choice

Renowned for it's quality and striking high gloss finish, Inaba Denko trunking is one of the best known and most popular plastic trunking systems in the UK.

Inaba Denko is the only system we stock to include a clever off-set joint fitting, perfect to kicking round obstacles on a trunking run.

Available in

Black: 72mm, 100m, 140mm

The darker days are drawing in and the weather is definitely getting chiller, so it must be time for our Winter Promo500.

Some of the old favourites are making a return because, let's face it, you can't have a Winter Promo500 without the classic Greenmill Snood and Americano Mug.

It's a welcome return for the Wonder Grip Thermal Gloves, ideal for keeping your hands warm on site. And new to our Winter Promo500 are the super snug

OX Thermal Gloves. Wear them under your work boots for really toasty tootsies. Or if the fuel crisis continues, turn the heating down and wear these to bed instead.

Plus, these aren't just any old Border biscuits. They're "luxury" border biscuits with a posh purple box. What will you choose?
